

KBE System_58mm

Services by professionals

Quality made to measure for windows and doors – this we assure together: KBE as the system provider and your specialised window maker. PVC-U windows of KBE profiles are made and marketed only by selected specialised companies. The optimal professional service is a matter of course for these professionals.

Environment

Our window profiles are stabilised with eco friendly calcium/zinc instead of lead. This means not only better protection for the environment, but also better quality at every stage in the life of the window – with greater resistance to weathering, longer retention of glossy properties, and cleaner environmental protection that pays off.

Windows for every season!

KBE System_58mm

Cosy and convenient

Wellness, comfort, safety, open space. These make you feel all warm inside, and you think immediately of your own four walls where you can make yourself really cosy.

PVC-U windows of KBE profiles provide all the advantages that you have come to expect today from a window – above all outstanding thermal insulation, perfect sound insulation, high level of protection against forced entry, and an appealing design.

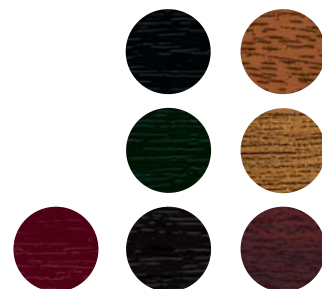

PVC-U windows of KBE profiles are made and marketed only by selected specialised companies. The optimal professional service is a matter of course for these professionals.

Ecological responsibility and sustainable cost effectiveness are the guidelines for our product development. Accordingly, KBE PVC-U windows are 100% recyclable and are subject to a return policy for regrinding in a closed cycle.

Every person is different. Which is fortunate, because that makes our world such a colourful place. And as different as people are, as equally diverse are their preferences for form and colour. Whether panel windows, round or basket arches, single- or multi-sash windows, round or triangular windows – with KBE everything is possible. This varied range of forms gives you the freedom you need to unfold your imagination! And the wide range of colours and wood grain laminates provides you with additional potential for giving your home that completely personal touch.

Three chamber double seal system with 58 mm installation depth

Yet what would walls be without windows? Are they not those that bring light to darkness and create ambience? That is why we are convinced: the value of your “own four walls” is just as much a matter of valuable windows serving to perfect a modern quality of life.

Whether you are planning a new building or renovating an old one – we can offer you windows for a wide range of styles blending harmoniously into every architecture. There are virtually no limits to your imagination!

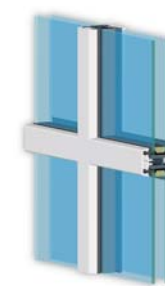

Cost effectiveness is the special advantage of our PVC-U windows: they are long-lived, weather resistant, easy care, and easy to maintain. And there is no need for paintwork.

Technology for the demanding

KBE System windows are designed in accordance with the state of the art. They fulfil all requirements that demanding developers expect of windows today.
