KBE System_70mm

That extra in contemporary quality of life

Cosiness, security, and comfortable living – these are the real values of your own four walls. And for this very reason your should not make any compromises in your choice of windows, but should find solutions that have been developed for enhancing the contemporary quality of life.

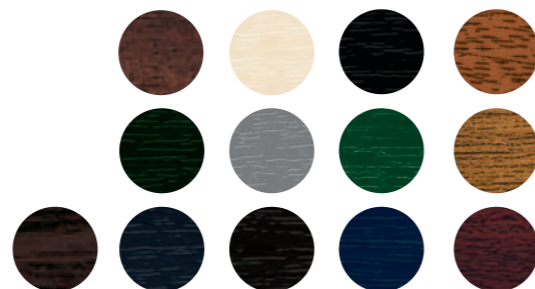

Windows from the KBE System_70mm have all been designed according to the state of the art. They are ahead in the most important criteria that fastidious developers demand today from windows.

Five chamber double seal system with 70 mm installation depth

KBE System_70mm windows help you to save heating costs and make homely cosiness even more palpable. An innovative five chamber technology and the larger building depth of the KBE System_70mm contribute to greater thermal insulation.

With their rounded contours and chamfered edges KBE System_70mm windows present a contemporary and particular harmonious look. Woodgrain foil and colour variants give you the freedom to design your own schemes.

Advantages for that feel good factor of home!

The larger installation depth of the KBE System_70mm can take thicker glazing, making it more difficult for burglars with jemmies. Moreover, these window systems can take security hardware that can be installed more deeply in the frame than usual. Not only thicker sound insulation glazing can be fitted in windows from the KBE System_70mm, but sound waves are also additionally absorbed by the deeper frame profile and its five insulating chambers.

KBE System_70mm windows provide the crucial advantages for that feel good factor of home:

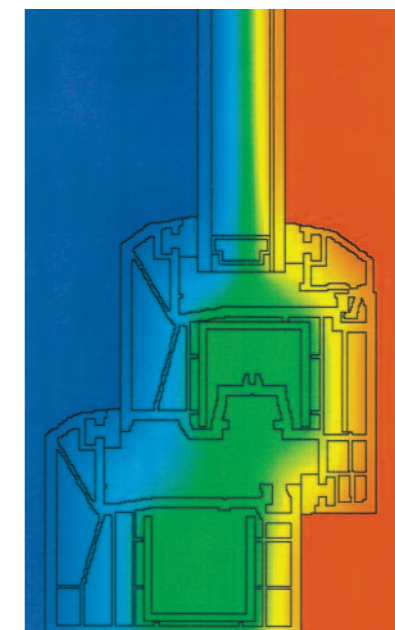

- enhanced thermal insulation
- greater sound insulation
- greater safety
- attractive design
